

# VERSETTA STONE®

## TEXTURED FINISHING ADHESIVE

### Textured Finishing Adhesive

Versetta Stone™ Textured Finishing Adhesive is a multipurpose structural adhesive and finishing caulk designed for bonding and finishing joints on Versetta Stone® mortarless stone veneer panels. Textured Finishing Adhesive forms a tough elastic seal that has a coarse texture to match Versetta Stone® panels and accessories. Plus it bonds well to metal coil stock or lathe for partial panel and accessory installations.

As part of the complete Versetta Stone® System founded on quality, speed and selection, Textured Finishing Adhesive is the perfect complement to Versetta Stone®, adding the finishing details to create a polished and professional-looking project.

- Coarse texture blends with stone veneer panels
- Perfect for small aesthetic repairs or odd material terminations
- Bonds well to metal coil stock for partial panel and accessory installations
- Can be used to conceal supplementary fasteners
- Solvent free, 100% solids will not shrink
- No special tools or mixing required for application
- Designed for applications in damp, dry or cold† climates

†At temperatures as low as 32°F (0°C)

### Available Colors

- Charcoal
- Taupe

Textured Finishing Adhesive is the recommended adhesive for Boral Versetta Stone®. For more information on the specific applications for Textured Finishing Adhesive, please refer to the Boral Versetta Stone® Installation Instructions. Refer to the Product Data Sheet for physical properties and performance. Both documents are located at [www.versettastone.com](http://www.versettastone.com)
